

Technical differences between Speedy Cleaner and its competitors

Rev.1

We have to say first of all that it's is not the **New EUROgrafica** policy to denigrate its competitors. We firmly believe that the SPEEDY CLEANER is one of the best flexo plate cleaner available on the market and we are aware that some of our competitors produce machines of low/medium quality and performances to succeed with the customers having a higher attention to the price than to the quality. Therefore, from our side no criticisms to our competitors' machines, but a description of the salient points of our SPEEDY CLEANER giving to you some sale arguments.

- **TANK COMPLETELY STAINLESS STEEL BUILT.** The use of the stainless steel guarantees the resistance to every kind of chemical product and to the deterioration for a timeless period. This tank will never suffer a deformation or break.
- **THREE BRUSHES FOR THE CLEANING OF THE PLATES.** The mechanical action of the 2 rotating brushes for the cleaning of the plate in the longitudinal direction and the mechanical action of the power traverse brush in the transversal direction, grant a perfect cleaning in a very fast time without compromising the integrity of the processed plate.
- **THE DETERGENT HEATING SYSTEM DIRECTLY CONTROLLED INTO THE RESERVOIR.** This peculiarity of the machine represents a high quality solution, granting a fast result (1), safe processing (2) and high performances.
As a matter of fact:
 - a worm detergent grants a more accurate cleaning of the plate
 - the oil bath heating system in diathermic oil of the resistor contained in a special stainless steel tube protects the components from possible direct contacts between an electric hot body and a chemical product, so protecting the operators
 - this system is the best solution available on the market, granting the cleaning of every kind of inks.
- **LIQUIDS STOCKING SYSTEM.** A sliding stainless steel drawer is equipped with 2 reservoirs for the liquids stocking.
- **THE CLICHES TRANSPORT SYSTEM.** This solution is our patent, specially conceived in order to prevent clichés jam, curling or deviation of the plate.
- **USE OF STAINLESS STEEL ROLLERS COVERED WITH A SPECIAL COTTON.** This New Euro exclusive design allows a perfect transport of the plates without possibility to change transport direction during the processing, then avoiding scratches or uneven cleaning.
- **USE OF SPONGE ROLLERS COVERED WITH SPECIAL COTTON.** Also this New EUROgrafica exclusive design grants a perfect squeezing of the plate with any thickness, making easier a perfect drying of the plate.

Technical differences between Speedy Cleaner and its competitors

Rev.1

- **LEVEL SENSORS IN EVERY RESERVOIR.** They grant a full control of the machine. To hold in the due consideration, the detergent reservoir automatic filling device.
- **THE ROLLERS PRESSURE ADJUSTMENT SYSTEM.** New EUROgrafica uses the system already installed on the offset machines 20 years ago, granting a perfect, automatic adjustment of all the possible clichés thickness.
- **A GREAT OPTIONS AVAILABILITY.** These options make the machine professional, granting high level performances.
- **LAST BUT NOT LEAST.** The very fast processing time, about 1' and 50", without compromising the integrity of the processed plates, is the best demonstration that the SPEEDY CLEANER is a heavy duty, reliable machine granting high level performances!!!

The above points allow to understand why the selling price of the **SPEEDY CLEANER** is higher than the machines of its competitors.
